MUZRAI COMMISSIONER'S REMARKS.

11) The Annachattram Savings Fund has already contributed a sum of over Rs.45,000/- for the construction of buildings for this Institute. If the further sum now required is not very large, it may be met from the closing balance of the Fund which according to revised estimates would be about Rs.26,000/- at the close of the year 1934-35.

Returned with compliments.

From the State Budget Estimates for 1933-34 it is seen that there is a provision of Rs 8,300/-, less the sale proceeds of the Industrial Sections, viz., Rs 500/- under 26 Education, 9 Technical Schools, (iii) Central Institute for Defectives. for the Central Institute for Defectives. Besides this, Government seem to be contributing Rs 1080/- for the Hostel, Rs 500/- for the Industrial Work and After-Care Fund and Rs 900/- for the Braille Fund (vide pages 10, 16 and 17 of Printed Report).

If the additional grants now required cannot be met from the budget of the Education Department, necessary provision will be made in the budget of the Chat-

TYPING SECTION.
25 JUL. 1935
GENL. & REV. SECTT.

No 62 & 25/7/1935 to the Director of Public Instruction Calling for additional information

Proof 31/7

The D.P.I has stated that it is not possible to divert the sanctioned grants of the Education Dept in order to make increased grants to the Institution.

The urgent requirements of the Institution are mentioned in the D.P.I's letter dated 13.7.35 - / Subd with reference to Members Minute at para 28 supra

BS 7/8 of the D.P.I. states that - arrangements have to be made for the re-admission of boys trained in the school, this means that there is practically no demand for boys trained in the school. In the case of blind boys, the only subject that can be taught to them to any purpose

is music (vocal and instrumental), as this will enable them to earn a livelihood as musicians or teachers of music. Education ~~in the~~ according to the Braille system will not be of much use to them, as no employer (Govt. or private) keeps Braille correspondence or Braille accounts. It is therefore a point for consideration whether further development of the Braille system in a school ~~with~~ is of any use. Teaching the arts referred to in item (ii) on page 2 of P.R.-D-1, carpentry, blacksmith's ~~and~~ work, basket-making and rattan work may ~~help~~ helps deaf and dumb boys to earn a livelihood. It is therefore a point for consideration whether the lines of development ~~suggested~~ by the D.P.I. ~~are impracticable~~ such as purchasing a radio receiving set are not and whether his proposals will be of much practical use improve the lot of defectives trained in the Institut

Remarks

9 AUG. 1935

P.R. 8-8-35

Refer:— II Members Minute at para 28 supra.

The D.P.I. states that it is not possible to suggest any diversion out of the Savings funds of the Edn. Dept.

As regards the urgent requirements of the Institute Hand refer is invited to D.P.I.'s letter dt 13.7.35 (Encl I).

47) The proposal is to sanction an additional grant of Rs.1,000 per annum for two years to start with, to the Central Institute for Defectives from the Chattram Savings Fund. Before sanctioning any grant, it is necessary to obtain details for the expenditure proposed to be incurred.

About Rs 30,000 has already been incurred out of Chattram Savings Fund for this institution (towards the construction of the building) in addition to the usual Government grants for the school and hostel, and there should be a limit to the amount which Government can give for the benefit of an individual institution which has already received a large benefit from Government. The limited amount available in the fund should be utilised for the benefit of as many institutions as possible

NOTE.—Contn. Sheet.

Note

There are two points on which a note is required to be furnished, Viz.,

(i) How the Annachattram Fund is being utilised;

(ii) Whether it is not possible to further divert some money out of this Fund to the Deaf and Dumb School Mylapore.

As regards point (i) above a copy of the Budget Estimates of the Chattram Savings Fund for the year 1934-35 is furnished. From this the financial position of this Fund may be indicated to be as follows:

Receipts	Rs 91,821-6-0
Expenditure	Rs 66,916-15-0
Closing Balance	Rs 24,904-7-0.

Certain additional items of unavoidable expenditure in the Municipal Area, have been coming time to time, during the current year, allowed as recommended by the Municipality to be met out of this closing balance.

Details of Expenditure out of this Fund are furnished in paragraphs 2-3 of the G.O. dated 10th May 1934.

As regards point (ii) above, it is submitted that the following expenditure

NOTE—Contn. Sheet

WD 01955—GPS—22,500—12-6-34

amounting to Rs 50,500, has been ordered from time to time to be met from Mungrai funds, towards the construction of the Central Institute for Deaf & Dumb at Mysore (This is taken to be the Deaf and Dumb School Mysore referred to in para 6 supra)

During 1929 and 1933.
(i) Chattram Savings Fund — 22,500.
(ii) Additional grant from this Fund } 5,000
(iii) Nowl Krishnadas charities Fund 5,000
Total Rs 32,500/-

During 1934-35 (iv) Chattram Savings Fund Rs* 18,000

Grand Total Rs 50,500

* Item 16, G.O. dated 10-5-3.

It will thus be seen that out of a total income of Rs 92000 of this Fund a sum of Rs 45,500 or nearly 50% has already been ordered to be utilised from the Chattram Savings Fund for the Deaf and Dumb Institute at Mysore, during the current year a sum of Rs 18,000, has as stated above been provided in the Chattram Savings Fund for expenditure on the construction of this Institute As to whether any further contributions from this Fund may be made for the purpose, the Mysore Government should

File No. of 193

Serial No.	
	be consulted unofficially in the matter.

KRISHNASAMI, B.Sc., B.T.,
Hon. Secretary.

CENTRAL INSTITUTE FOR DEFECTIVES.
MYSORE.

Date 27:5:... 1935.

Dear Sir,

With reference to your Post Card of the 25th instant, I send herewith a copy of the latest Annual Report of the Institution.

Yours sincerely,
V. Krishnasami.

To,
The Manager,
Office of the Mysore Commissioner,
in Mysore,
Bangalore.

ANNUAL REPORT OF THE CENTRAL INSTITUTE FOR DEFECTIVES, MYSORE

For the Years 1932-33 and 1933-34

MYSORE:
PRINTED BY THE ASST. SUPT., GOVT. BRANCH PRESS
1935

ANNUAL REPORT OF THE CENTRAL INSTITUTE FOR DEFECTIVES, FOR THE YEARS 1932-33 AND 1933-34.

Principal Events.—The two most outstanding events to be recorded in relation to the working of the Institute during this period were :—

(i) The celebration of the School day on 22nd December 1932 when His Highness the Yuvaraja of Mysore graciously presided and distributed the prizes to the successful winners in sports. The valuable speech which was delivered on that memorable occasion is printed as an appendix to this report.

(ii) The other important event of the period was the laying of the foundation stone for the main building of the Institute by Her Excellency Lady Willingdon who was graciously pleased to visit the Institute on the 3rd December 1933, inspected the work turned out by the several departments of the Institute, and laid the foundation stone of the main building before a large gathering of officers and the élite of the city.

Prizes were also distributed to the winners in sports both among the deaf and blind children.

Her Excellency's further appreciation was evinced when orders were placed for the purchase of cloth woven by the blind children of the Institute.

The 3rd December 1933, was thus a Red Letter Day in the annals of the Institute due to the fact that the most important want of the school was supplied by the arrangement which was made for this important extension of the Institute buildings.

The buildings constructed in the first stage consisted of two work rooms, the kitchen and dining rooms, and the bath rooms and lavatories. There was no separate accommodation for teaching general subjects, for the conduct of the various industrial activities of the Institute or for dormitories for the boarders.

The main building which was under construction has just been completed and this has supplied a long felt and urgent need.

This most useful addition to the premises estimated to cost about Rs. 37,000 was rendered possible by the munificent donation of Rs. 25,000 by Mr. Boyce, the well known philanthropist, and the kind sanction of Rs. 12,000 by Government.

The committee cannot be sufficiently thanktul for the generosity of Mr. Boyce in coming to the aid of the poor defective children of the Institute.

Government Teaching Grant.—The following are the figures of the receipts and disbursements in respect of the purely literary and industrial portion of the work, which is entirely a charge upon the Government.

Full effect was given to the recommendations of the managing committee on the re-organisation of the Institute alluded to in the report of 1931-32, by the appointment of C. Siddia as Weaving Instructor, Abdul Razak as Rattan Instructor, K. Rangaswamy as Literary Instructor of the Blind.

The addition to the staff thus made has enabled the institution to pay more individual attention to the pupils in their training both in the literary and industrial sections and thus fit them better to earn their livelihood after they leave the Institute.

On the recommendation of the Managing Committee N. Narasimhaiya who lost his eye-sight while he was a student in the First Year B.A. class, was sent to be trained in the art of teaching the blind at the Victory Memorial School for the Blind, Poonamalle, Madras, under the superintendence of Mr. Bell. While he was under training the Government were pleased not only to sanction a stipend of Rs. 25 per mensem but

also to pay tuition fees of Rs. 100 for the whole course.

He has returned after completing his course successfully and a recommendation has been made to Government to provide him with the post of a teacher in the blind section.

The usual classes were continued. The following tables show the results of the examination :—

Serial No.	Class	No. on rolls on 30th June 1933	No. passed	No. on roll on 30th June 1934	No. passed

4	Prept. A ...	4	3	5	4
5	„ B ..	5	3	5	4
6	„ C ...	7	4	6	5

Literary Education for the Blind.—In the first year class the Braille Alphabet and Numeration and Notation were taught. In the other classes the curricula of studies obtaining in Kannada Lower Secondary Schools were followed, the subjects taught being Kannada, Arithmetic, History, Geography and Hygiene. The highest class corresponded to the Lower Secondary class.

The teaching of English was introduced two years ago, and half a dozen students have advanced up to the third year class.

As the blind have lost the most valuable of all the senses, their only chance to compete with the seeing is to be superior to them in intelligence. It is this, which makes education still more indispensable to the Blind than to the Seeing, and in selecting a calling one should be preferred in which the other senses are as important as or more important than the sense of sight. The profession of music is such a calling and the conclusion that might have been formed as to its value a priori is abundantly confirmed by experience.

In addition to literary instruction the blind are therefore taught music—vocal and instrumental including veena, harmonium and thabla.

The following blind students were succesful in the music examination of the grades noted against their names:—

1.	M. Sivanna ...	Vocal Music	II Proficiency.
2.	Rangasetty ...	Do	III do
3.	Rangasetty ...	Do	I Senior
4.	H. Venkata Rao	Veena	I Junior
5.	H. S. Puttanna ...	Do	II do

Literary Education of the Deaf.—The deaf are instructed by the oral method. In the preparatory classes voice production and voice training were attended to and exercises in speech reading were copiously given.

The primary standards made fairly good progress in both articulation and speech reading with the result that some of them are able to read words and phrases.

THE FOLLOWING ARE EXTRACTS FROM THE REPORT OF THE DEPUTY DIRECTOR OF PUBLIC INSTRUCTION, MYSORE DIVISION, MYSORE, ON HIS INSPECTION OF THIS SCHOOL ON THE 28TH AND 29TH JUNE 1934.

Accommodation.—The present building serves both the residential and instructional purposes. But the accommodation for conducting classes is inadequate. A new building is under construction, and when com-

pleted it will house the school. The present building will then be used entirely for residential purposes.

Sanitary Condition.—Favourable conditions for the health of the inmates have been provided in the planning of the building, and more specifically in the arrangement of bath rooms and lavatories. Sufficient care of the general health and physical well-being of the pupils is taken. The building and compound are kept tidy. Hygienic habits are attempted to be developed in the pupils.

Discipline, Dress, etc.—The pupils looked tidy and well clad. The boys are well behaved and are, evidently, well looked after.

Blind Section : Mr. P. Gundu Rao.—There are 3 pupils in this class, the average age of the pupils being 18. Two of them have been in the school for 8 years and one has remained for $7\frac{3}{4}$ years.

The standard of the Vernacular Lower Secondary course is attempted in this section and the text-books prescribed by the department for that course are followed. But the content of the course is lightened by the omission of certain portions owing to the comparatively slow progress the pupils make by reason of their natural defects. On the other hand, English is included in the course while it has no place in the Vernacular Lower Secondary course.

I was told that the boys in this class had completed the course in all the general subjects and that this year they were concentrating on English, Music, and vocational training, in which they were receiving instruction on more advanced lines.

The class was having an English lesson and the text studied was that prescribed for supplementary reading for the III year class of an ordinary Middle School. I tested the pupils in reading and their ability was fairly comparable to that of an average pupil in third year Middle School class. This constituted a really good progress in the study of English.

Second Class Kannada: Mr. Rangaswami.—Kannada First Reader was studied in the class and the pupils'

average ability was even higher than that of pupils in the corresponding grade in ordinary schools.

There were 6 pupils in this class whose stay in the institution varied from one to six years. Four of them have been in the institution for two years and their general progress is satisfactory, considering the period of their stay in the Institution.

Deaf Section Preparatory Classes A. B. C.—The work in this section is done by Messrs. M. P. Krishnappa, Venkatarama Iyer and is mainly oral, conducted according to special programmes. There are no text-books followed. The teachers have to prepare material for each stage of work. Instruction is individual and progress is very slow. A deaf child learns in four years what a normal one learns in four months. Only reading involving voice training, articulation, speech reading, writing and arithmetic are attempted. In arithmetic, progress is slightly quicker than in reading and writing; and written methods are adopted.

Religious and Moral Instruction.—Religious and moral instruction and practice are provided, for Bhajana parties are organised out of school hours on Saturdays, besides religious lessons. Mr. A. Rama Rao is mainly responsible for these parties. Daily prayers are conducted and a religious atmosphere is maintained in the daily life of the boarders as far as possible.

Music.—It must be said to the credit of the staff of the school that the blind boys were trained in the dramatic art and three plays were successfully staged in public. The acting was so realistic as to merit high praise.

Extra Curricular Activities: Drill, Games, Sports, Scouting Excursions, etc.—Sufficient importance is given to physical culture in this institution. Mr. M. P. Krishnappa is in charge of the physical activities. A running track has been made and is fitted with wires for the blind boys. Merry-go-rounds are provided. Badminton and football courts provide opportunities for ball games. Some indoor games such as chess have also been introduced. Three times

a week scout classes are conducted by Mr. Varadaraja Iyengar, in which 20 blind and 4 deaf pupils participate. Instruction in the case of the blind is mainly in the theory of scouting, and in the case of the deaf it is entirely practical. A good *esprit de corps* is developed in this way.

A varied and instructive programme of excursions is drawn up every year and the children are taken to witness tournaments, matches and processions and visits to factories, workshops, and musical performances are arranged.

The general impression of the Inspecting Officer with respect to the efficiency of the institution and suggestions made for its improvement.— The programme of vocational instruction and training includes rattan work, spinning, weaving and music (instrumental and vocal) if the last could be classed under vocational subjects. Garden work which was carried on a fairly large scale has been unfortunately given up for want of adequate supply of water. In regard to vocational instruction, the programme of work done and the degree of skill attained by the pupils is not sufficient, I understand, to ensure economic independence of the pupils after they leave the school. Instead of distributing the pupils' time between 2 or 3 vocational subjects, it appears to be desirable to train them specifically in one trade and aim at developing sufficient skill by extending the course of vocational training, if necessary, so as to enable them to make a living after they leave the school. Of the subjects of industrial training provided, tailoring and carpentry in the case of the deaf seem to offer better avenues for earning a livelihood. Chikmaking has been recently introduced as an industrial subject, and this appears to be a suitable industry for the blind. Along with it, mat and rope making could be taught as its remunerative character appears to be more assured. I feel inclined to repeat the suggestion made in the last report regarding arrangements to establish an agency

Statement of Receipts and Expenditure of the Hostel attached to the Central Institute for Defectives, Mysore, for the Years 1932-33 and 1933-34

The following table shows the classification of boarders according to districts on the 30th June 1934:—

District	Deaf	Blind
1. Mysore	17	27
2. Bangalore	5	5
3 Hassan	2	2
4 Shimoga	0	2
5. Chitaldroog	0	4
6. Kolar	0	1
7. Tumkur	0	3
8. Chickmagalur...	2	1

There were in addition 2 students from Bangalore Civil and Military Station, and 2 from Coorg.

There has been no restriction as regards caste in the matter of admission of pupils to the Institute as can be seen from the following statement:—

Castewar statement of the No. of boarders as on 30th June 1934.

Caste	Blind	Deaf	Caste	Blind	Deaf
Brahmins ...	4	12	Kshatrias ..	1	2
Lingayets ...	11	1	Goldsmiths ...	3	...
Christians ...	...	3	Washerman ...	1	...
Mahomedans ...	...	3	Naidus ...	1	1
Barbers ...	3	...	Others ...	5	2
Adikarnatakas	2	...	Weaver ...	1	. .
Vokkaligars ...	12	3	Vaisyas ...	2	...

Total ... 46 Blind and 27 Deaf.

The Sub-Assistant Surgeon attached to the Epidemic Diseases Hospital looks after the health of the boarders by paying daily visits to the Institute.

The weights of the boarders are taken every month, rules for recording the weighments in the register

having kindly been furnished by Dr. M. V. Gopalaswamy B.A., B.SC., PH.D., Professor of Psychology, Maharaja's College, Mysore. These are examined at the committee meetings and remedial measures adopted. All the pupils were treated for worms and re-vaccinated and inoculated, as the case may be, whenever there was a scare of epidemics.

The managing committee met 6 times during 1932-33 and 7 times during 1933-34.

The committee records its deep regret at the passing away of Rao Bahadur Dharmaprakasha Sahukar D. Banumiah who was a great benefactor of the Institute and the sad demise of Rev. F. Hodgkins who was a valuable member of the managing committee.

During the period under review Rajasilpa Visarada Rao Bahadur Mr. B. Subba Rao who had served on the committee for a long time tendered his resignation owing to failing eye-sight.

The committee was strengthened by the addition of the following members during this period: —

1 Rev. G. W. Sawday.
2 Rev. Thomas
3 Dr. Ratnamma Isaac.
4 Mr. D. B. Vishvambhariah.

In the months of February, March and April 1933 during the absence of the President on leave, Mr. C. S Kuppuswamiengar kindly presided at the meetings.

Every endeavour is being made to make the lives of pupils happy and cheerful. With this end in view, the deaf boys were taken every week according to a pre arranged monthly programme to places of interest such as the Brindaban, Seringapatam, the Railway Work shop, the Sandal Oil Factory, the Krishnarajendra Mills the Saw Mills, the Chamundi Hills, etc.

The Blind were taken to the Band at the park on full moon days, the loud speaker and to musical per formances by experts.

A gramophone with select records which was pur chased out of the donation kindly given by Dr. Metcalfe

a set of draughts, a chess board and hulikuri provided out of hostel funds are intended to relieve the monotony of the lives of the blind pupils.

The committee take this opportunity of conveying their thanks to the Secretary, Sakuntala Karnataka Nataka Sabha to admit 10 blind boys of the Institute free of charge to their performances and to the Proprietor, Lakshmi Cinema, who has consented to admit the deaf boys of the Institute free of charge once a month.

Special feeds were given to the boys on 15 occasions, 10 of these being provided by the committee out of the interest on special feeding fund and 6 as follows :—

	Rs.	a.	p
Dr. Nanjappa	5	0	0
Mr. H. C. Dasappa	30	0	0
„ N. S. Subba Rao ...	25	10	3
„ K. Mylari Rao	5	0	0
„ Honnappa....Rice and tamarind.			

The thanks of the committee are due to the above gentlemen and also to Dr. Metcalfe for a donation of Rs. 50 which was partly utilised for subscribing towards a Braille magazine and partly for purchasing a gramophone.

Visitors to the Institute.—

27th October 1932	...	Dr. T. S. Nanjappa, M.B. & C.M. Retd., Surgeon. T Mardy Jones, Esq., ex-Parliamentary Member, London.

(The opinion of Mr. Mardy Jones is given as Appendix B.)

16th December 1932	...	A. V. Thakkar, Esq., Servants of India Society.
18th December 1932	...	Y. V. Krishna Murthy, Esq.
14th February 1933	...	P. Austin, Esq.
23rd February 1933	...	Mr. Winifred Carey, League of Nations, Geneva.
13th September 1933	...	Mr. E. S Raman, Director of Public Health, Cochin State.
28th October 1933	...	Dr. T. N. Jacob, M.A., Ph.D., Professor of Education.
22nd September 1934	...	Dr. T. N. Jacob, M.A., Ph.D., Professor of Education.

Dasara Exhibition.—As in past years arrangements were made to demonstrate the work of the Institute and also for the sale of articles manufactured by the defectives.

From the charity box a sum of Rs. 134-5-8 during 1932-33 and Rs. 107-13-8 during 1933-34 was collected. The sale proceeds were Rs. 38-15-9 and Rs. 45-5-9, respectively in the two years under report.

It is gratifying to note that a Gold Medal Certificate was awarded to the Institute in 1933 for excellence of garden products, while another one was secured in 1934 for proficiency in music.

Dramatic Association.—The blind boys of the Institute formed a Dramatic Association and practised two dramas, Manmatha Vijaya and Dhruva Vijaya, which were staged before the public at the Rangacharlu Memorial Hall. It is gratifying that this novel experiment was a thorough success. The committee take this opportunity of recording their sense of gratefulness to Mr. N. S. Subba Rao, the Director of Public Instruction in Mysore, Sirdar M. Gopalaraj Urs, Mr. C. S. Kuppuswamiengar, Deputy Commissioner, Mysore District, and Sir Mirza M. Ismail, the Dewan of Mysore, for having kindly presided on some of these occasions and thus helped the cause of the unfortunate defectives.

The following statement shows the net profit derived by these performances :—

			Rs.	a	p.
Dhruva Vijaya on	7-10-33	...	102	15	3
Do	11-10-33	...	200	0	9
Manmatha Vijaya on	4-2-34	...	74	4	6
Do	11-6-34	...	49	8	0
	Total	...	426	12	6

The committee have to record their obligation to the following for giving benefit performances in aid of the Institute and the handsome contribution made :—

			Rs.	a.	p.
Professor Ramkumar	...	...	102	12	7

	Rs.	a.	p.
Srimati Yadugiri Kumari	40	0	0
Mr. Narayana Rao, Manager, Sri Lakshmi Cinema.	50	0	0

Scouting.—The question of the possibility of developing scouting among the deaf and blind boys was under the consideration of the committee for some time past. In the end it was decided to entrust this work to Mr. Varadaraja Iyengar, Scout Master, Sarada Vilas High School, who has trained two troops up to the Tender Foot stage, one of the blind consisting of 20 boys; another of the deaf consisting of 12 boys.

It is a matter for congratulation that the scout troop of the deaf boys in the Institute won the first prize in the knot race in the city Scout Rally held at the Sarada Vilas High School, Mysore.

Audit of the Accounts.—Though the accounts of the Institute are audited by the department it is only occasional. It was felt by the committee that the staff needed much more help in reconstituting the system of accounts, since the Institute proper and the Hostel are maintained by separate funds and the Institute comprises many activities such as the literary, the industrial, and Braille printing, departments whose accounts are to be kept separately.

Mr. Ramakrishna Iyer, Certified Auditor, was entrusted with the work of not only auditing the accounts of the whole period ever since the institution was taken over by Government, but also advising the committee upon the re-organisation of the system of maintaining the accounts relating to different departments of the Institute.

The detailed and valuable report of the Auditor was considered by the committee at the meeting held on 5th August 1933.

The committee wish to place on record their appreciation of the work of the members of the staff in having kept the accounts correctly.

Industrial Work and After-Care Fund.—The following statement exhibits the figures of receipts and expenditure in connection with industries :—

RECEIPTS.

Item	1932-33			1933-34		
	Rs	a	p.	Rs.	a.	p.
Opening balance	116	14	6	500	0	0
Government grant	500	0	0	500	0	0
Sale proceeds of manufactured articles	249	8	4	265	7	3
Government grant for wages to boys	150	0	0	150	0	0
Total ...	1,016	6	10	915	7	3

EXPENDITURE.

Item	1932-33			1933-34		
	Rs.	a.	p.	Rs.	a.	p.
Purchased raw materials ...	466	14	6	500	0	0
Remittance of sale proceeds ..	249	8	4	265	7	3
Wages earned transferred to After-Care Fund	300	0	0	150	0	0
Total ..	1,016	6	10	915	7	3

Of the deaf boys, 12 were learning spinning, 9 weaving, 14 rattan work and 27 gardening; of the blind boys, 6 were taught spinning, 3 weaving, 34 rattan work.

In the course of the year Mr. Yoganarasimham was requested to test the musical capacities of the blind

boys so that only those who have got an aptitude might be trained in this subject, the others being put on to the different industries.

The Braille Fund.—Of the total annual grant of Rs. 900 given by Government for this purpose, a sum of Rs. 636 was spent during 1933-34 for the following purposes :—

	Rs.
Establishment charges	336
Material for printing books and equipment.	330

The Braille Typewriter which was purchased during this year has been serving a very useful purpose.

The books printed in Braille for the use of the blind pupils during the period are (1) Hindu Charitre, Parts 1, 2, 3. (2) Translation. (3) Macmillan's Primers and (4) Saralarogya.

Conclusion.—In conclusion the committee beg to state that the institution has been able to turn out satisfactory work during the course of this period both in the literary and industrial sections, while the amenities for the poor defectives have been provided as far as funds permitted.

The need for further support from the public as well as from Government for increasing the strength and usefulness of the institution continues to be as great as ever in view of the fact that this institution has been able to touch only the fringe of the problem of educating and ameliorating the condition of the defectives; according to the census of 1931 there are between 2,500 and 3,000 blind and deaf children of school going age in the State.

Even with the present strength of the Institute, it has been very difficult to make the expenses cover the income. If these unfortunate children are to be made useful and worthy citizens instead of being, as they are now, a burden to their parents and a drag upon society, the activities of the Institute will have to be enlarged in many directions, chief of which is the provision of

workshops—where not only the present students but ex-pupils of the Institute may be employed in various remunerative industries.

It is to be hoped that support from both the Public and Government will be forthcoming in ever increasing measure to enhance the activities and usefulness of this institution.

APPENDIX A.

Speech of His Highness the Yuvaraja of Mysore on the Occasion of the Distribution of Prizes at the Central Institute for Defectives, Mysore, on Thursday the 22nd December 1932.

LADIES AND GENTLEMEN,

There is one sentence in the Report of the Deputy Director of Public Instruction, of which extracts have been read to us to-day, which I think is worth all the rest put together. He says: "Those who have seen this institution five years before and see this again, cannot fail to appreciate the great improvements effected in every aspect of its work." And the Report of the Doctor gives us one instance: "The average daily sick has been reduced in the last year from 5 to 3·33; there is a general increase in the weight of all the students; there has been no skin disease in the course of the past year."

I am one of those who have been interested in this institution, not for five years, but for several times that period, and I can assure you that it is a very great pleasure to me to see these unfortunate boys housed in comfortable and sanitary premises, nourished on good and satisfactory food, clothed in neat uniforms, enjoying themselves in gardening and in sports and pastimes, and showing on their happy faces the essential beginnings of a *mens sana in corpore sano*. When I compare them with the sickly individuals of a few years ago, getting their only exercise in walks taken hand in hand, a majority of them suffering from skin disease, and generally bearing the marks of affliction on their faces, I feel that the Deputy Director is fully justified in making his remark. And I feel that I shall be borne out in this matter by another old friend of the school, who is also its originator and founder, Mr. M. Srinivasa Rao, whom I am very glad to see present here to-day rejoicing in the healthy growth of this child of his old age.

I think we may also congratulate the committee on the prudent management of their finances, which has resulted in a satisfactory balance in hand, and on the care that they have devoted to making the various funds which they have established each serve its own particular purpose. I was especially glad when I

was asked a short while ago to agree to the transfer of th money I had given to the Institute for the purchase of a Braill press, from that to the After-Care Fund, the purpose of which i to give boys leaving the Institute a good start in life. My onl wonder is whether, if this After-Care Fund continues to grow, i would not be better, so far as the boys who live in Mysore ar concerned, instead of trying to enable each of them to start i life in a small way by himself, to establish a workshop some where in these spacious grounds at which any deaf or blind mai living in the city would come and secure work at a steady rat of wage, which would be organised for them on the basis o similar institutions in England

But, Ladies and Gentlemen, there is another side to th picture Even this Institute, progressive as it is, has a grea multitude of needs. The Deputy Director of Public Instructio points out, what we can all see, that it has only got half a building, and that it wants more teachers and has many othe requirements The committee, in their concluding prayer, have given a list of wants which apparently they have limited in length, only because they see no prospect of those they have set forth being gratified I sincerely hope that the time will come very soon when, whether from private charity or Government funds, both these lists of wants may be fulfilled

But again, granted that all this is done, I am afraid, we are still on the fringe of the question. We have here 72 boy defectives There are 7 girls in the Vocational Institute fo Women, and there are perhaps 30 in Bangalore Supposing we put it at 110 in all, then that means, I am afraid, that a good deal less than 1 in 30 of the defectives in the State are receiving relief What are we doing for the other 3,000 and odd? From the condition in which the children are brought into this Institute, from the condition into which they relapse when they go to their own homes, and from the condition of the blind boys we see in the streets, one cannot help but conclude that their lo is a very miserable one It behoves us all as citizens of Mysore to take steps to see that they are all cared for; and I hope, not only that this Institute will grow in the years to come to many times its present strength, but that many like it will spring up throughout the State for the relief of this particular form of distress.

And in addition to this curative measure, I should like all concerned to devote themselves to what is far more important, that is, measures of prevention. I believe I am right in saying, as regards the blind children in the State, that a very large majority contract blindness from the neglect of two very common diseases: the first, the ophthalmia neonatorum, which a very simple treatment is sufficient to prevent; the second, small-pox,

against which vaccination is a complete protection. I would therefore like to appeal to you all to-day to support, not only this charity, but another in which I am deeply interested and the claims of which will very shortly be put before you. I refer to the local branch of the Red Cross, which is busy on propaganda all the year round and is shortly to organise another Baby Week. I believe there is a prevalent opinion among those who have not studied the subject that a Baby Week consists in rather a noisy tamasha where prizes are given to the fattest children, with the result of causing much heart-burning among the mothers, and sweetmeats are distributed to the rest. If any of you have taken this view of these functions, I want you to rid yourselves of it at once and to believe that a Baby Week properly conducted is by far the best way of affording the coming generation of Mysore citizens a fair start in life. It has often been said that the new-born baby is the most helpless being in the world, and it is our duty, if we want the State to prosper, to give the Mysore babies the help they need. It is not enough to take those that are sick to the hospital. What is needed is to keep the healthy ones healthy, and one way of doing that is to prevent blindness by seeing that this dreadful affliction of the eyes of newly-born babies is nipped in the bud immediately any signs of it began to appear. As for small-pox, I need hardly enlarge on the benefits of vaccination, but I do want all concerned to help in impressing on careless parents what a criminal thing it is to expose their children to this dire disease because of the small amount of trouble involved in getting the vaccination done. It is for work of this sort that the propaganda branch of the Red Cross exists, and I should like to be assured that it has the sympathy and support of all citizens of good will in the city.

Ladies and Gentlemen, I am sure you will agree with me in congratulating the staff of the Institute on a very successful year's work, and in appealing to the charitably minded people of the whole State to put their hands in their pockets to enable this work to be increased a hundred-fold.

APPENDIX B.

Remarks made by Mr. Mardy Jones, M. P., in the Visitors Book of the Institute.

"I was very impressed with the efficiency with which these helpless boys are being trained and the method of teaching is excellent.

The Head Master is the right man in the right place and is imbued with the right spirit of service."

To

H.V. RAMASWAMI, ESQ., M.A., B.L.,
General Secretary to the Government of
His Highness the Maharaja of Mysore.

SIR,

SUBJECT:-

Additional financial help to the Central Institute for Defectives, M y s o r e .

- - ooOoo - -

With reference to your letter No. 1716/Muz. dated 26th June 1935, regarding the financial help to the Central Institute f o r Defectives, Mysore, I have the honor to state that the President of the Managing Committee of the Institute who was consulted in the matter has sent me a note of the requirements prepared by the Secretary of the Institute, and adds that "if there is any prospect of further grants being available for development schemes, there are more than one direction in which I should like to propose major developments, which I have not yet suggested because I thought there was no prospect of getting funds for them."

The note which is sent herewith for perusal of Government and kind return, falls into three parts :

I. Sections (1) and (2) deal with the present establishment and grants for several purposes.

II. Under the head "Urgent requirements of the Institute," two sets of proposals are made, one for recurring expenditure and

the other for non-recurring expenditure :

(A) Requirements involving recurring expenditure:

i. Employment of a person trained to manage Workshops;

ii. Additional courses in Carpentry, Tailoring, Book-binding, Map-making;

iii. Provision for re-admission of boys who have left the Institute but are not employing their time usefully;

iv. One more teacher for the Deaf Section in order that individual attention could be given to all the boys;

v. Appointment of a whole-time --- Warden;

vi. Appointment of one more peon in addition to the three now sanctioned; and,

vii. A demonstration grant to advertise the work of the school.

(B) Proposals involving non-recurring expenditure:

i. Provision for purchase of cane-bending machines and moulds;

ii. A stereo-typing machine, Pyke-Glauser Braille Writer, ---- Braille Geographical maps, -- Braille Watch, Yard Stick, &c.,

iii. Books dealing with the education of the Defectives;

iv. Eight desks for class-rooms;

v. Almirahs for keeping articles;

vi. A dozen work stools for the -- rattan section;

vii. Some big mirrors to be put up in the Deaf class-rooms;

viii. A shed for the looms;

ix. Another zinc shed for storing fuel; and,

x. A Radio-receiving set.

In none of these cases is any idea given as to the

amount involved but the note winds up with the ~~suggestions~~ statements that :

1. The appointments of a clerk-warden and a peon are very important;

2. As it is not possible to state the cost of requirements, a grant of Rs 1,500/- could be usefully spent on the most urgent needs.

It will be seen that some of the items on which the expenditure is proposed are of the nature of additional -- facilities for the work that is now done, while in other cases developments are proposed. As Sir Charles Todhunter says, the question of developments can be considered only if there is any prospect of additional funds being sanctioned, and if Government will kindly say what additional provision is likely to be sanctioned for increased efficiency or development of the work done in the school, I shall request Sir Charles Todhunter to formulate detailed proposals to expend the sum of money to be placed at his disposal.

I have the honour to be,

Sir,

Your most obedient servant,

N. J. Suwami Rao

DIRECTOR.

N.J.P./11-7.

Central Institute for Defectives,

Mysore. 4th July 1935.

Submitted.

I beg to submit herewith letter No.A1.5289-732 of 34-35 dated 2nd July 1935, from the Director of Public Instruction, addressed to you. Some of the particulars regarding the information asked for is herewith submitted for your kind reference.

I DETAILS OF GRANT SANCTIONED TO THE INSTITUTE.

(1) Establishment:-

The following is the statement showing the names of the members of the staff and the salaries drawn by each, which is entirely a charge upon Government.

Honorary Secretary		25/- allowance.

Dasanna	"	25
S.Govinda Rao	"	15 and 10 from Hostel grant.
C.Siddaiya	Weaving Teacher	27
C.Siddaiya	"	25
M.Loganatha Mudaliar	Rattan Tr.	25 and 6 Braille.
Abdul Razak	"	17
3 peons	one on 12 and two on 11.	
Contingency	Office	10.

(2) Braill grant

Government Order No. ~~750-1~~ 781-2 Fdn. 240-21-18 dated 28-7-28.

Grant Of Rs. 900 a year Rs 600 for Establishment and Rs 300 for Contingencies.

(3) Industrial grant.

G.O. No. 750-1 Edn. 630-4 dated 23-3-31.

grant of 650 a year Rs. 500/- for purchase of raw materials and Rs. 150/- as wages to be credited to the After-care fund.

(4) Hostel Grant

Rs. 90/- a month for establishment.

HOW THE GRANTS ARE BEING UTILISED.

(1) The establishment salary is paid each month.

The contingency amount may or may not be spent in full each month. It is used economically to collect together a larger amount for purchase of any article of permanent value.

(2) Braille grant.

The sanctioned establishment charges are Rs.50 a month. The present expenditure is only Rs.29 a month and the balance of grant is lapsed.

The Committee proposed an allowance of Rs. 15 to Narasimhaiya and an increment of Rs.2 to a blind Copmpositor which was turned down by Government as financially unacceptable.

The contingency grant is fully utilised.

(3) Industrial grant.

It was informed somewhere in February that the grant for the year 34-35 was only Rs.300/-

Rs.150 have been added to the After-care fund. The rest of the money has been used for raw material and equipment. The sale proceeds of manufactured articles have been credited to Government.

(4) Hostel grant

This is treated as a lump-sum grant.

Rs.84 are being spent now and Rs.6 added to the Hostel fund.

III THE URGENT REQUIREMENTS OF THE INSTITUTE.

1) The improvement of the Industrial section.

It is at present in charge of a teacher who knows very little of Industrial management and the Instructors are merely skilled labourers with no cultural knowledge or organising ability. The employment of a person who has had training in the management of workshops is necessary in preference to one of the Instructors of the present time.

Some cane-bending machines and moulds for the Rattan Secti and certain improved appliances in the weaving section would be immediate requirements. (I shall be seeing the Superintendent of the Technical Institute and the Weaving Inspector and submit to you their suggestions in the matter.)

Carpentry, Tailoring, Book-binding, Mat-making are some desirable additions to the Industrial section. There are only 24 deaf boys and many of them are youngsters. As it is, there may not be much use. Almost all the boys are so poor that they can not start and keep on an industry by themselves without an organisation to help them.

Many of the boys who have left are, as I learn, not usefully employing their time. It is possible to make them live economically & independent if provision is made for their ~~xxxx~~ readmission and separate accomodation is given to them.

Similarly for the Blinds.

Literary work.

A stereotyping machine to emboss thin metal sheets. Pyke-Glauser Braille writer, Braille geographical maps, Braille watch, yard stick etc. are necessary requirements.

1 set physiological charts, 1 set of pictures ~~xx~~ of animals birds etc for object lessons, alphabet charts, Ball-frames, Kindergarten and Montessori gifts, hand mirrors, hearing tubes are some of the requirements of the deaf sectior.

A bone-conducting hearing aid (Sonotone) may be obtained as an experimental measure.

There are only two masters in the deaf section and I understand they can not give enough individual attention to all the boys. One more teacher may be added if possible A 4

3) Library

There are no books dealing with the education of the defective A few books giving practical suggestions and lesson books and charts are immediate necessities. B 3

4) Furniture

8 desks are required for the class rooms. Boys are at present sitting on the floor on mats. B 4

Some almirahs for keeping the articles are needed as no cup-boa is provided in any of the rooms of the new building. D 5

A dozen work stools for the rattan section are wanted. D 6

Some big mirrors are to be fixed up in the walls of the deaf classrooms. D 7

5) Hostel. A 5

An appointment of a wholetime warden is most urgent as the present arrangement of a teacher being warder has not been very convenient. He can also be the clerk of the school. The clerical duties are too heavy to be done by a master in additic to his teaching work as both the duties are now found to suffer

There are now only three peons for both the Hostel and the school and one more is necessary. A 6

6) Building.

Some shed for putting in the looms may be advisable in preference to the substantial structure now, when this hall will be released for better purpose.

Another zinc shed for storing fuel is also desired.

The compound is to be levelled up into terraces to provide suitable playgrounds.

7) Radio. I understand a scheme is afloat to introduce in all schools having a reading room and sports fund Radio. A special grant has to be made for this institute.

8) Demonstration grant

To advertise the work of this school it may be desirable

WHAT ADDITIONAL GRANT IS REQUIRED FOR THE REQUIREMENTS.

It would not be possible to state exactly the cost of requirements as the scope of improvements may be made in proport to the grant.

However a grant of Rs 1500 or a little more may be usefully spent on the most urgent needs.

The appointment of a clerk-warden and that of a peon are very important.

I pray your pardon for this long note.

G. Krishnasami.
